

How to recognize changes

When was the last time you thought about your insomnia? Try using the prompts below to reflect on any changes you may have noticed. Then you can think ahead about what could make sense for you going forward.

What is DAYVIGO?

- DAYVIGO is a prescription medicine for adults age 18 years and older who have trouble falling or staying asleep (insomnia).

1 **Compare the past to where you are now.** Think about a time in your life when your insomnia was at its worst. Compare where you were then to how you're doing now.

Back then, I usually...

Think about the areas in your life that were affected by insomnia.

These days, I usually...

Is anything different from before?

2 **Reflecting on changes.** If you have not seen any change, please consult your doctor. If you have identified a change, think about how it has impacted you and your loved ones. Write it down below.

I feel...

My loved ones feel...

DAYVIGO may cause serious side effects including:

- **decreased awareness and alertness.** The morning after you take DAYVIGO, your ability to drive safely and think clearly may be decreased. You may also have sleepiness during the day. Do not take more DAYVIGO than prescribed. Do not take DAYVIGO unless you are able to stay in bed for a full night (at least 7 hours) before you must be active again. Take DAYVIGO right before going to bed.

Please see Selected Safety Information throughout and accompanying [Medication Guide](#).

Keep going. Think about something you'd like to accomplish this week if you are able to get enough sleep.

I want to...

Next, think about some additional things you can do that could help with your insomnia. For example, you could try...

- A relaxation technique like meditation or progressive muscle relaxation

- Putting away my phone and avoiding other electronics for approximately 30 minutes to an hour before bedtime

- Dimming all the lights in the house in the evening

- Not “fighting it” when I haven’t been able to fall asleep for more than 20 minutes—I will get up and do something else instead

- Doing a relaxing activity before bed, like taking a warm bath or practicing deep breathing

- Setting consistent bed and wake times, even on weekends

After a few nights, think about the impact this change has made. Consider adding more changes over time that can continue to help you.

Finally, don't forget to give yourself credit—if something is working for you, keep it up!

Selected Safety Information

Do not take DAYVIGO (lemborexant) if you fall asleep often at unexpected times (narcolepsy). DAYVIGO is a federally controlled substance because it can be abused or cause dependence.

Before taking DAYVIGO, tell your healthcare provider about all of your medical conditions, including if you:

- have a history of depression, mental illness, or suicidal thoughts; drug or alcohol abuse or addiction; a sudden onset of muscle weakness (cataplexy); daytime sleepiness
- have lung problems or breathing problems, including sleep apnea
- have liver problems
- are pregnant or plan to become pregnant
- are breastfeeding or plan to breastfeed.

Please see Selected Safety Information throughout and accompanying [Medication Guide](#).

Selected Safety Information

Tell your healthcare provider about all of the medicines you take, including prescription and over-the-counter medicines, vitamins and herbal supplements.

- Taking DAYVIGO with certain other medicines can cause serious side effects. DAYVIGO may affect the way other medicines work and other medicines may affect the way DAYVIGO works.
- **Do not take DAYVIGO with other medicines that can make you sleepy unless your healthcare provider tells you to.**

What should I avoid while taking DAYVIGO?

- **Do not drink alcohol** while taking DAYVIGO. It can increase your chances of getting serious side effects.
- **Do not drive**, operate heavy machinery, do anything dangerous, or other activities that require clear thinking if you take DAYVIGO and have had less than a full night of sleep (at least 7 hours) or if you have taken more DAYVIGO than prescribed by your healthcare provider.
- You may still feel drowsy the next day after taking DAYVIGO. **Do not** drive or do other dangerous activities until you feel fully awake.

DAYVIGO may cause serious side effects, including:

- **temporary inability to move or talk (sleep paralysis) for up to several minutes while you are going to sleep or waking up**
- **temporary weakness in your legs that can happen during the day or at night**
- **complex sleep behaviors** such as sleep-walking, sleep-driving, preparing and eating food, making phone calls, having sex or doing other activities while not fully awake that you may not remember the next morning.
- **worsening depression and suicidal thoughts have happened during treatment with DAYVIGO.**

The most common side effect of DAYVIGO is sleepiness.

These are not all of the possible side effects of DAYVIGO. Call your doctor for medical advice and if you have any new or worsening side effects.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
